

UX Testing + UI Iteration

	User Interface: How could the styling of elements be changed to make a more visually appealing, clear, and space efficient layout? (ex: sizes, colors, fonts, alignment, etc.)	User Experience: What elements of the user experience could be improved to make the page more intuitive and more fun/satisfying? (ex: sounds, hover effects, press effects, etc.)
User 1 Name: Romeo	<ul style="list-style-type: none">• Thinks that during the process of making the viewing smaller it gets too much empty space.• Have images that are not clickable a little bit darker.• Thinks that I should have the breakpoint a little earlier.	<ul style="list-style-type: none">• I think that the sounds are good.• Add more effects when hovering over images that are clickable.• Add a button that will reset the images.
User 2 Name: Justin	<ul style="list-style-type: none">• Like the hover effects, add a little more effects to clickable.• Likes the layout and breakpoint.• Thinks that I should have the images scale when shrinking.	<ul style="list-style-type: none">• A little bit more intuitive.• Have the bottom clickable image play a sound.• Have images pop out not divs.
User 3 Name: Liyah	<ul style="list-style-type: none">• Likes the format of the images. Have the text at the top actually be text not an image.• Have a drop shadow around the text on to other images.• Have a border around the images.	<ul style="list-style-type: none">• Have a little more button affects when clicking.• Thinks I should add sound to the other button.• Shorten the sound of the car a little bit.
User 4 Name: Gio	<ul style="list-style-type: none">• Have the breakpoint be a little bit earlier because it is a little late.• Have colors around the images in a border that match the theme.• Extend images a little bit more to fit empty space.	<ul style="list-style-type: none">• Thinks that the sound is a little long and could be shortened a little.• Have it to where if you click the sound button again, it stops the sound.• Add audio to the button that swaps images.
User 5 Name: Allan	<ul style="list-style-type: none">• The image on the bottom right could be a little bit bigger.• Have the breakpoint be earlier because it is too small when it switches.• Try switching text of max verstappen to text not an	<ul style="list-style-type: none">• Add more clickable buttons to the website.• Have music play when you click the other button.• Add a reset button to reset images, instead of having to reload.

UI Before Feedback (Screenshot / GIF)*What trends did you identify in your feedback?*

- Making the breakpoint a little bit earlier because the images get too small before it breaks.
- Add more effects to the clickable buttons to make them a little more intuitive.
- Have sound play when you click the button that swaps the two side images.
- Have a border around the images to make it look cleaner.
- Shorten the sound of the car because it is too long.
- Have the images pop out instead of the divs.

UI After Feedback (Screenshot / GIF)*What changes did you make to improve your UI?*

- I made the images pop out instead of the whole boxes.
- I changed the Max Verstappen #1 text at the top to actual text and not an image.
- I made the breakpoint occur sooner because the images would get too small before.
- I shortened the sound of the engine so that it would not go as long.
- I added sound to the image so that when you click, it changes the side images.
- I added more button effects, the images get bigger when hovering, and while clicking, the image brightness goes down.
